

NETWORK RADIO GATEWAY SOFTWARE VERSION 5

Revolutionize Your Communications with the Network Radio Gateway software version 5 (NRG5) Elevate your operations with NRG5—the industry's leading advanced Radio over IP (RoIP) gateway solution that's transforming the way organizations connect. Engineered to deliver reliable, scalable, flexible, and secure radio communications, NRG5 seamlessly bridges the gap from the tactical edge to enterprise networks.

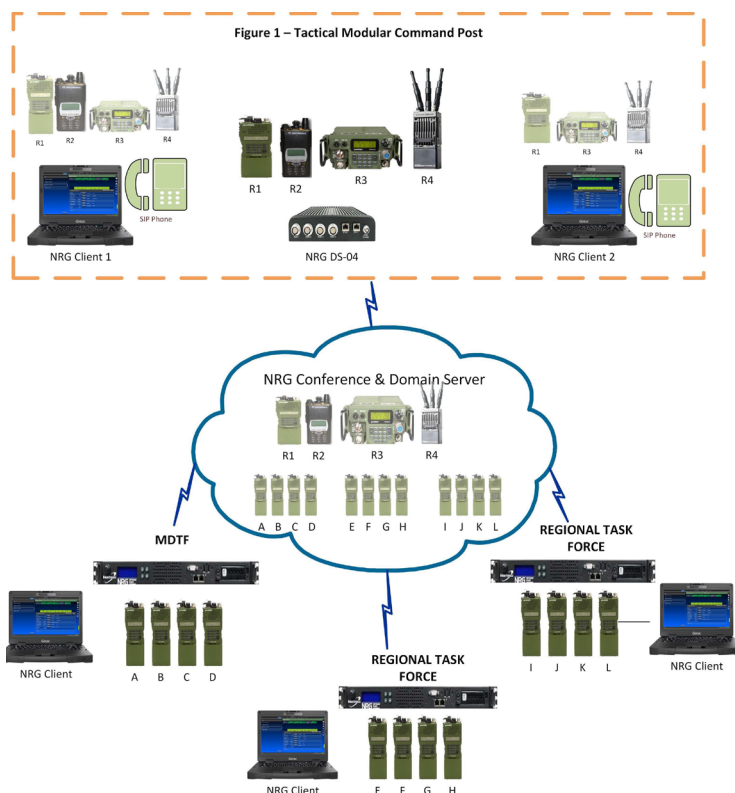

Your All-In-One RoIP Solution Why juggle multiple systems when you can have a complete solution? NRG5 gateways and clients offer comprehensive support for voice packet routing, protocol conversion, and radio voice bridging (cross-banding). Maximize interoperability across diverse communication platforms and ensure your team stays connected, no matter the devices they're using.

Unmatched Control and Data Management Take command with NRG5's unparalleled software suite. Our cutting-edge technology provides exceptional capabilities in remote radio programming, control, and radio data management. Simplify your operations by managing your entire radio network from a single, intuitive interface.

Experience the NRG5 Advantage Today Don't settle for ordinary when you can have extraordinary. Upgrade to NRG5 and unlock a new era of seamless, efficient, and secure communications. It's not just a gateway—it's the future gatekeeper of Radio over IP technology.

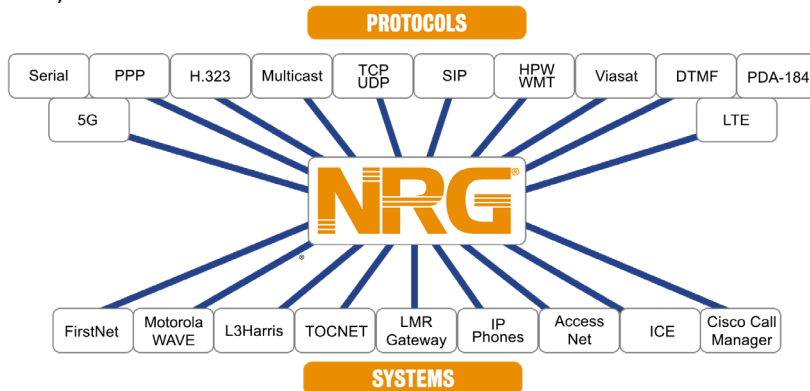

NEW ENHANCED FEATURES & CAPABILITIES

- ▶ New easy-to-use and intuitive touch-based user interface
- ▶ Enhanced radio interoperability with remote data and radio control for new software defined and legacy radio
- ▶ Decentralized meshed server-client architecture for fault tolerant, modular, and scalable deployments
- ▶ No single central point of failure among NRGs in the network
- ▶ Small command post to full enterprise integration
- ▶ Operates in tactical-standalone configurations or multiple radio circuits across IP subnetworks
- ▶ Supports PPP, Sync, Async, L3Harris® CPA, HPW WMT, and MIL-STD 188-184 (PDA-184) data technology
- ▶ Full recording and playback of all radio voice and conference audio for forensics and operational analysis
- ▶ Robust, self-monitoring, self-restoring network uses failover priority (automatic recovery)

NRG INTEROPERABILITY

NRG is the gatekeeper for all supported protocols and it enables seamless mission communications across multiple VoIP/RoIP systems.

RADIOS SUPPORTED: EoIP, DS-XX, RM-XX

DATA

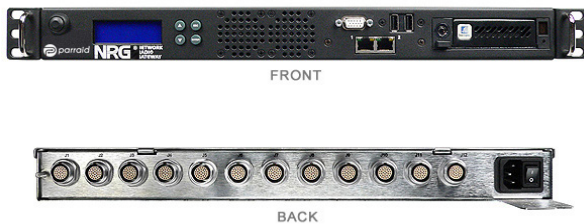

- ▶ AN-PRC-160 **NEW!**
- ▶ AN/PRC-163 **NEW!**
- ▶ AN/PRC-167 **NEW!**
- ▶ AN/PRC-152/152A
- ▶ AN/PRC-117G
- ▶ AN/PRC-137
- ▶ AN/PRC-150
- ▶ AN/PRC-148
- ▶ RF-5800
- ▶ AN/PRC-117F

VOICE

- ▶ Iridium PTT **NEW!**
- ▶ Kenwood **NEW!**
- ▶ Any radio with NATO U-229 and U-329 audio connector **NEW!**
- ▶ SINCGARS
- ▶ HMS
- ▶ Motorola XTL-5000
- ▶ Motorola XTS-5000
- ▶ Motorola XTVA
- ▶ Motorola Micom 3R
- ▶ Raytheon ACU-1000

RACK MOUNT SYSTEMS

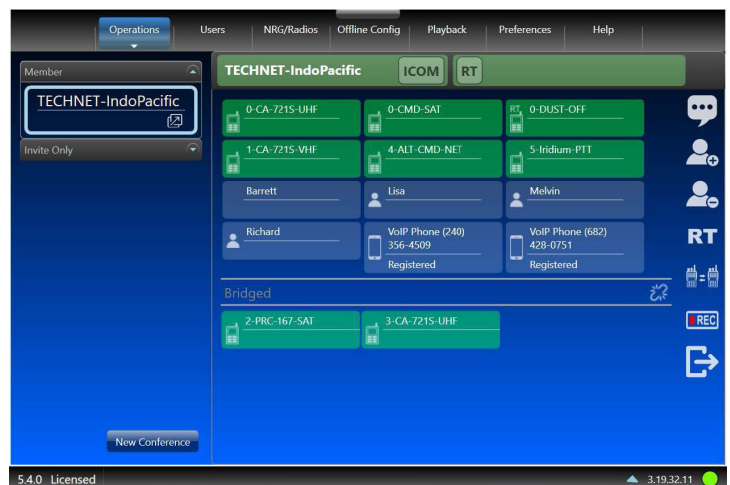

- ▶ Available in RM-04, RM-08, and RM-12
- ▶ Networking support for up to 12 radios and up to 400 endpoints (any combination of users and radios)
- ▶ Easily removable Solid-State Drive (SSD)
- ▶ Fits in standard 1U 19" rack space

NRG Mobile Suites

DEPLOYABLE SYSTEMS

- ▶ Networking support for up to four radios and up to 50 endpoints (any combination of users and radios)
- ▶ Easily removable compact flash card for operating system
- ▶ Rugged, fanless enclosure for field survivability
